PRODUCT DESCRIPTION

PICSChip Repair Compound is a polymer modified cementitious repair compound for Pattern Imprinted Concrete (PIC) or any other external or internal decorative surfaces.

PURPOSE

PICSChip Repair Compound is used to repair areas of PIC that has damage such as chips, scratches and scuffs.

SPECIAL PROPERTIES

- Hard wearing and durable
- Freeze thaw resistant
- Available in over 20 colours
- Easy to mix

APPLICATION INSTRUCTIONS

The area to be repaired should be free of any contaminants, including water. Wet an area close to the repair, try and match the wet colour using unpigmented **PICSChip Repair Compound** mixed with the pigmented **PICSChip Repair Compound** you require. Before applying **PICSChip Repair Compound** the area should be damp. Mix **PICSChip Repair Compound** into a putty consistency, (not an overly wet paste) and rub thin layer of the material into the surface. Build up to the required thickness. As the repair starts to set sweep over with a dry paint brush, removing excess material from the surface. Trowel, texture or finish as required.

Full application instructions available on request.

PACKAGING

1kg tubs (except Slate Blue 750g).

HEALTH AND SAFETY

PICSChip Repair Compound is non-toxic and non-flammable. Avoid contact with skin and eyes. Flush affected areas with water. Do not take internally. Refer to the Safety Data Sheet for further information.
