PRODUCT DESCRIPTION

Efflorescence Remover is a clear acidic liquid used to remove efflorescence whiteness, and cementitious contaminations.

PURPOSE

Efflorescence Remover removes efflorescence whiteness caused by excess salt deposits from block pavers, sandstone and other natural stone products (not to be used with black limestone or marble).

SPECIAL PROPERTIES

- Removes efflorescence whiteness caused by excess salt deposits
- Removes excess mortar
- Removes cement stains
- Used to clean any old concrete surfaces such as plain concrete, slabs and block paving and make them look brand new - this only works if the area is unsealed

NOTE:

- Not to be used on black limestone or marble
- Always test a small area first

APPLICATION INSTRUCTIONS

Gloves, overalls, boots and goggles should be worn at all times during application. Protect metal surfaces and paint-work before application with polythene sheets and tape. Do not allow product to come into contact with metals such as steel, copper, aluminium and titanium. Ensure that water is ready to flood area if required.

First, fully saturate the contaminated surface with clean water, remove any excess sitting water then apply **Efflorescence Remover** neat or diluted with water up to 1:10, dilution rate will be dependent on the extent of the contamination. Immediately spread the product sparingly to the surface with an all plastic sprayer. Leave to dwell for a few minutes, rub the surface with a brush or broom and then wash with a high pressure water jet. Do not allow the product to dry on the surface. In cases of heavy contamination this procedure may need to be repeated also reducing the dilution rate will help.

APPROXIMATE COVERAGE

2 to 3m² per litre depending on application.

STORAGE

Store at minimum 5°C. Do not allow to freeze.

PACKAGING

Efflorescence Remover is supplied in 5 litre plastic jerry cans.

SPECIFICATION CLAUSE

"Remove salts from block paving and other stone products with Efflorescence Remover from PICS (Tel. 01635 202224). All materials should comply to ISO9001 for Quality Assurance. All work should be carried out in conjunction with the manufactures current Technical Data Sheet and instructions for use".

HEALTH AND SAFETY

Do not ingest. Wear gloves, protective glasses and clothing at all times. Avoid contact with eyes and skin. If in contact with eyes, wash immediately. Keep out of reach of children and animals. Refer to Safety Data Sheet for further information.
