PRODUCT DESCRIPTION

PICSTRIP-ECO is a water based sealer stripper.

PURPOSE

PICSTRIP-ECO is used to remove PICS solvent and water-based sealers from pattern imprinted concrete and stone products, or similar.

SPECIAL PROPERTIES

- Safe to use
- Powerful fast acting formula
- Water-based
- Formulated for use on PICS solvent and water-based sealer
- Gel consistency
- Suitable for use in both internal and external environments

APPLICATION INSTRUCTIONS

Ensure the area is clean. Apply in the cool of the day. Area does not have to be dry, but any standing water should be removed using an air blower. **ALWAYS PROTECT ALL SURROUNDING AREAS PRIOR TO WORK COMMENCING**. Work **PICSTRIP-ECO** into the surface with a broom. Do not treat areas bigger than your experience and / or conditions allow. Leave for approximately 30-45 minutes to allow the sealer to soften, prior to washing off using a quality high pressure water jet, eg. 3000psi 18l/min. An inferior machine will greatly extend washing times and potentially affect the success of the process. Wash diligently in a structured and controlled manner. Do not rush the process nor miss areas. (can be repeated if necessary). Once clean, wash with copious water.

COVERAGE

As a guide expect no more than 2m² per litre, although this is dependent on many factors, such as thickness/amount of sealer to be removed and ambient temperature.

PACKAGING

5 and 25 litre plastic jerry cans.

STORAGE

Store in a cool dry place out of direct sunlight. Shelf life 12 months.

HEALTH AND SAFETY

Keep container tightly closed. Use personal protective equipment. Avoid contact with skin and eyes. Emergency eye wash should be available in the vicinity. Do not eat, drink or smoke whilst handling the product. Do not mix with other chemicals. Refer to Safety Data Sheet.
